## TAG WORKFLOW (GIT FLOW)

### Consistent Branches

- 1) Master = production (only pull critical fixes)
- 2) Develop = development base

### Supporting Branches

- 1) Hotfixes = Critical fixes
  - pulls from master. Merged into dev & master
- 2) Release = RC (tagged).
  - pulls from dev. Merges into dev & master
- 3) Feature = Branch for feature work
  - pulls / pushes to dev
